About This Game

Will of the Gods is an **strategical 1v1 arcade game** where players play as Gods, each trying to guide as many followers as they can to their temple, while **punishing** those who choose to follow the *other* God. It's a game about **tactics**, **skill** and proving who the **better** one is! Pick an arena, choose your game settings and activate **gamemode mutators** to create a *chaotic* duel between you and a friend your rival.

Play at your own pace - be it casually, versus an AI or heat things up and fight a friend! Will of the Gods is easy to pick up but hard to master due to several gameplay mechanics and the presence of micro-management! If, perhaps, you want both fun(the

crazy type) and to prove that you are indeed the better player, you can activate several gamemode mutators to spice up your game.

Features

- Play *Online or Offline* versus a friend or an A.I.
- Become an almighty **God!** Prove once and for all who is better!
- Change gamemode settings and activate mutators to *augment your gameplay*
- Pick from a variety of levels
- Guide followers to your temple to secure your victory
- Cast **lightning** to make enemies lose their faith or summon **tornadoes** to split large groups up !

What is STARHAWK DOWN?

Starhawk Down Overview

Welcome to the world of the Egyptian gods. Set, a cunning and chaotic deity, has fired life in his old pantheon's stomping ground. He's gathered a bunch of followers and clan and a new realm for himself now he's planning to reshape reality in the god realm of the Maatians.

That's the starting point for Set Rising, and this One Sheet adventure is a taste of the gaming experience you'll find between the covers of that book.

STARHAWK DOWN

Realm: Sunfire Domain (HQ for the techno-Egyptian pantheon)

Starhawk Down

We start this adventure with your demogods flying in the back of a techno-Egyptian military fleet, doublechecking their combat equipment. They've scripted an emergency call from Hekat, an agent of the Egyptian god Horus, who's after a quick response unit. Hekat and his boss are good guys, the sort that true heroes should want to help. So here they are, being guttled through the Maatians on a top-down while Hekat, Lilek's fleet, shouting over the background noise of the Her's thrusters.

Bad game.

It's good for trading cards. There's nothing here that you haven't seen done before or done better. Waste of time.. Amazing game! Good puzzles, graphics and musics!. Pretty fun game, if you like god-like simulators where you have to create an efficient city, balancing it's productions and want to create your perfect place, this is the game for you!. Pros:

-Great music

-Nice artwork

-Good atmosphere

-Good price

Cons:

-Looked promising based on the reviews, but the resulting game leaves a lot to be desired.

-The text, which is overly descriptive and full of grammatical errors, is almost impossible to read.

-The ending that I achieved (assuming it is the only ending) was unecessary and unwarranted.

(ie,\u2665\u2665\u2665\u2665\u2665. Hey its basically free game.. For a free game, this was DEFINITELY worth the play. The game is short. 10 hours max, but the story is rich for a free to play game. This is worth anyone's time really.. Great game!!! I'm really enjoying it... :)

I really like this game it is one of my favourites. as you might be able to tell with how many hours I've played. The only thing I would change is I would like more middle class white male avatars.. Needs a lot of work. It really wasn't ready yet for everyone.. My fault for not checking what was included, but I expected DLCs. Regardless, what you do get from this upgrade is not worth it.. Very good Escape the room genre game. The puzzles have just the right amount of difficulty and the solutions make sense. I took my time and got 4.5 hours worth of playtime. Only con is the graphics and textures can be sometimes not very detailed that it leads you to miss some clues like blurry words.. A great story, meant to be played multiple times. This should keep me busy for a while!. Remove this from the store please, it's not even a game just a scam and they already said they will not continue to work on this. There are literally better games on flash sites from 2000.. so the game itself was interesting and fun until I ran into a game ending bug (I presume it was a bug). Near the ending, the player has to place 3 map pieces in a Map frame, and that opens up a locker revealing a statue that is required to proceed with the game ending. So the locker did not open, and the map frame continued to say "Map Frame Empty. Nothing I could do except stop playing the game. My OS is Windows 10 (up to date).

Since i had played over Steam's maximum refund time of 2 hours, they refused a refund. I understand this, but think due to the circumstances, the product did not perform properly, prevented further gameplay, and a refund was in order.

Unfortunately, I'd have to not recommend the game, as the problem I experienced may occur for others. Otherwise, I would have recommended it.. this is a very good game sweet strategy, nice community, from time to time some competetiveness very nice big battles and a very well made leaderboard its just great, thumbs up ^-^
